WANNER™ HYDRA-CELL® PRO PUMPS

WASTE WATER & CHEMICAL DISPOSAL / Hydra-Cell Pro replaces aging pumps with easier-to-maintain solution

A large multinational steel company uses three plunger pumps to dispose of water and process fluid. They have aging Bethlehem pumps which are difficult to service and parts are difficult to source.

They have replaced one of them with a Q155E and will replace the other two after gaining experience with the Hydra-Cell.

Wanner Hydra-Cell

Pro Q155 pump was selected for the following reasons:

- Seal-less design with no packing to wear or replace
- Reliable operation with less maintenance
- Easier to service

 **WANNER™**
HYDRA-CELL® PRO
SEAL-LESS PUMP TECHNOLOGIES

Pump: Hydra-Cell Pro Q155

Media: Ammonia Liquor

Flow: 157 GPM (595 lpm)

Pressure: 700 psi (48 bar)

Inlet Pressure: 50 psi (3.5 bar)
